

Package `model`

Enum Class `AuditEntityType`

```
java.lang.Object
  java.lang.Enum<AuditEntityType>
    model.AuditEntityType
```

All Implemented Interfaces:

`Serializable`, `Comparable<AuditEntityType>`, `Constable`

```
public enum AuditEntityType
extends Enum<AuditEntityType>
```

Enum que define los tipos de entidades que pueden ser auditadas en la plataforma.

Nested Class Summary

Nested classes/interfaces inherited from class `java.lang.Enum`

Method Details

values

`public static AuditEntityType[] values()`

Returns an array containing the constants of this enum class, in the order they are declared.

Returns:

an array containing the constants of this enum class, in the order they are declared

valueOf

```
public static AuditEntityType valueOf(String↗ name)
```

Returns the enum constant of this class with the specified name. The string must match *exactly* an identifier used to declare an enum constant in this class. (Extraneous whitespace characters are not permitted.)

Parameters:

name - the name of the enum constant to be returned.

Returns:

the enum constant with the specified name

Throws:

[IllegalArgumentException[↗]](#) - if this enum class has no constant with the specified name

[NullPointerException[↗]](#) - if the argument is null
